

Wall covering made of stoneware and glass.

Material:

Bloom is a strong, compact material, which is easy to maintain and particularly decorative.

The elements are handcrafted in stoneware and glass; the colour of the decoration remains transparent, luminous, and lets the porosity and the imperfections of the surfaces show through.

Characteristics:

The natural materials composing Bloom react in an unpredictable way to the handcraft production processes to which they are subjected.

The surface of the elements may present differences in thickness and slight variations of the tone and the density of the colour; these features are to be considered a value that makes each element unique and inimitable.

Dimensions:

Bloom elements have a dimension of 7x7x0,7 cm.

Bloom elements are also available already mounted on aluminium panels having the standard dimension of 70x70 cm.

The panels are provided with two aluminium rods each for the direct fixing to the wall.

Applications:

Covering of vertical surfaces, both indoors and outdoors, in residential as well as in public.
