

Large bench.

The Concreto series also includes a dining table.

Bases: Seres, fastened by a structure in gloss-varnished stainless AISI 316, avorio or grafite colour; adjustable plastic spacers.

Seat: composed of five elements positioned onto the base, aligned and hold firm by steel elements existing onto the structure:

- in Seres
- in Seres "Tracce" décor
- in Lias
- in Clastos "Sigilli" décor
- in Opus ceramica.

Notes:

Seres, Lias, Clastos and Opus ceramica are outdoor surfaces that are produced with a mix of limestone and clay and are treated on the surfaces to limit absorption of liquids and greasy substances. Any small surface imperfections (stains, porosity, thin surface cracks due to the settling of the piece) are characteristics of the handcraft processing and do not affect the quality of the product.

The Seres surfaces feature pastel colours with a shaded effect; those in Seres with "Tracce" décor are engraved and coloured in contrasting hues. The surfaces in Lias are decorated with a modern ceramic micro-mosaic crafted by hand, while those in Clastos are available with a geometric design in ceramics, named Sigilli.

To compose correctly the seating area of the Concreto bench two side elements and three central elements are to be selected. The standard composition of the bench implies that each selected element is made in the same colour selected for the base.

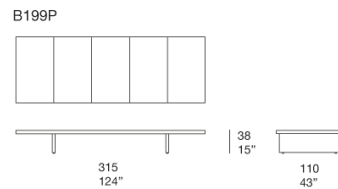

Concreto

design : F. Rota

Upon request, the steel structure can be gloss-varnished also in the other colours in the collection.

This product can be used also in interior environments.

We advise to use a Winter Set protection cover.
