

Dining table.

Top: aluminium honeycomb veneered with Abonos™ ash wood.

Top edge: dyed oak heartwood.

Structure: steel, matt varnished in grafite colour; spacers in plastic and felt.

Structure covering: dyed oak heartwood.

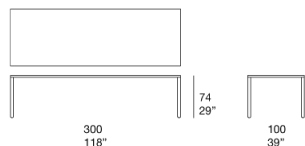

Notes:

The covering in dyed oak heartwood of the structure completely hides its varnished steel core.

Abonos™ is a wood of river origin characterized by a millennial permanence in the water, where it has transformed through the action of sediments such as gravel, sand and clay. The series of chemical mutations to which it has been subjected by nature has made each trunk a unique piece, in colour and design, without affecting the structural qualities of hardness and strength.

Abonos™ ash wood and dyed oak heartwood are treated with a transparent acrylic varnishing cycle.
