# ACQUA ESSENZA

the essence of sophistication and comfort

Acqua Essenza, designed by Bertrand Lejoly, opens a new chapter in the shower experience. With meticulous attention to detail, Acqua Essenza expresses both refinement and comfort, transforming the daily shower into a ritual of unparalleled sophistication.

A perfectly worked edge elegantly frames the Essenza showerhead, accentuating its visual appeal. The diffuse ambient lighting that emanates from the interior projects a peaceful light, offering an aura of tranquility.

Essenza is also a synonym for ease of use, harmonic movement that's literally at your fingertips. Indeed, the buttons were designed very carefully to turn the shower

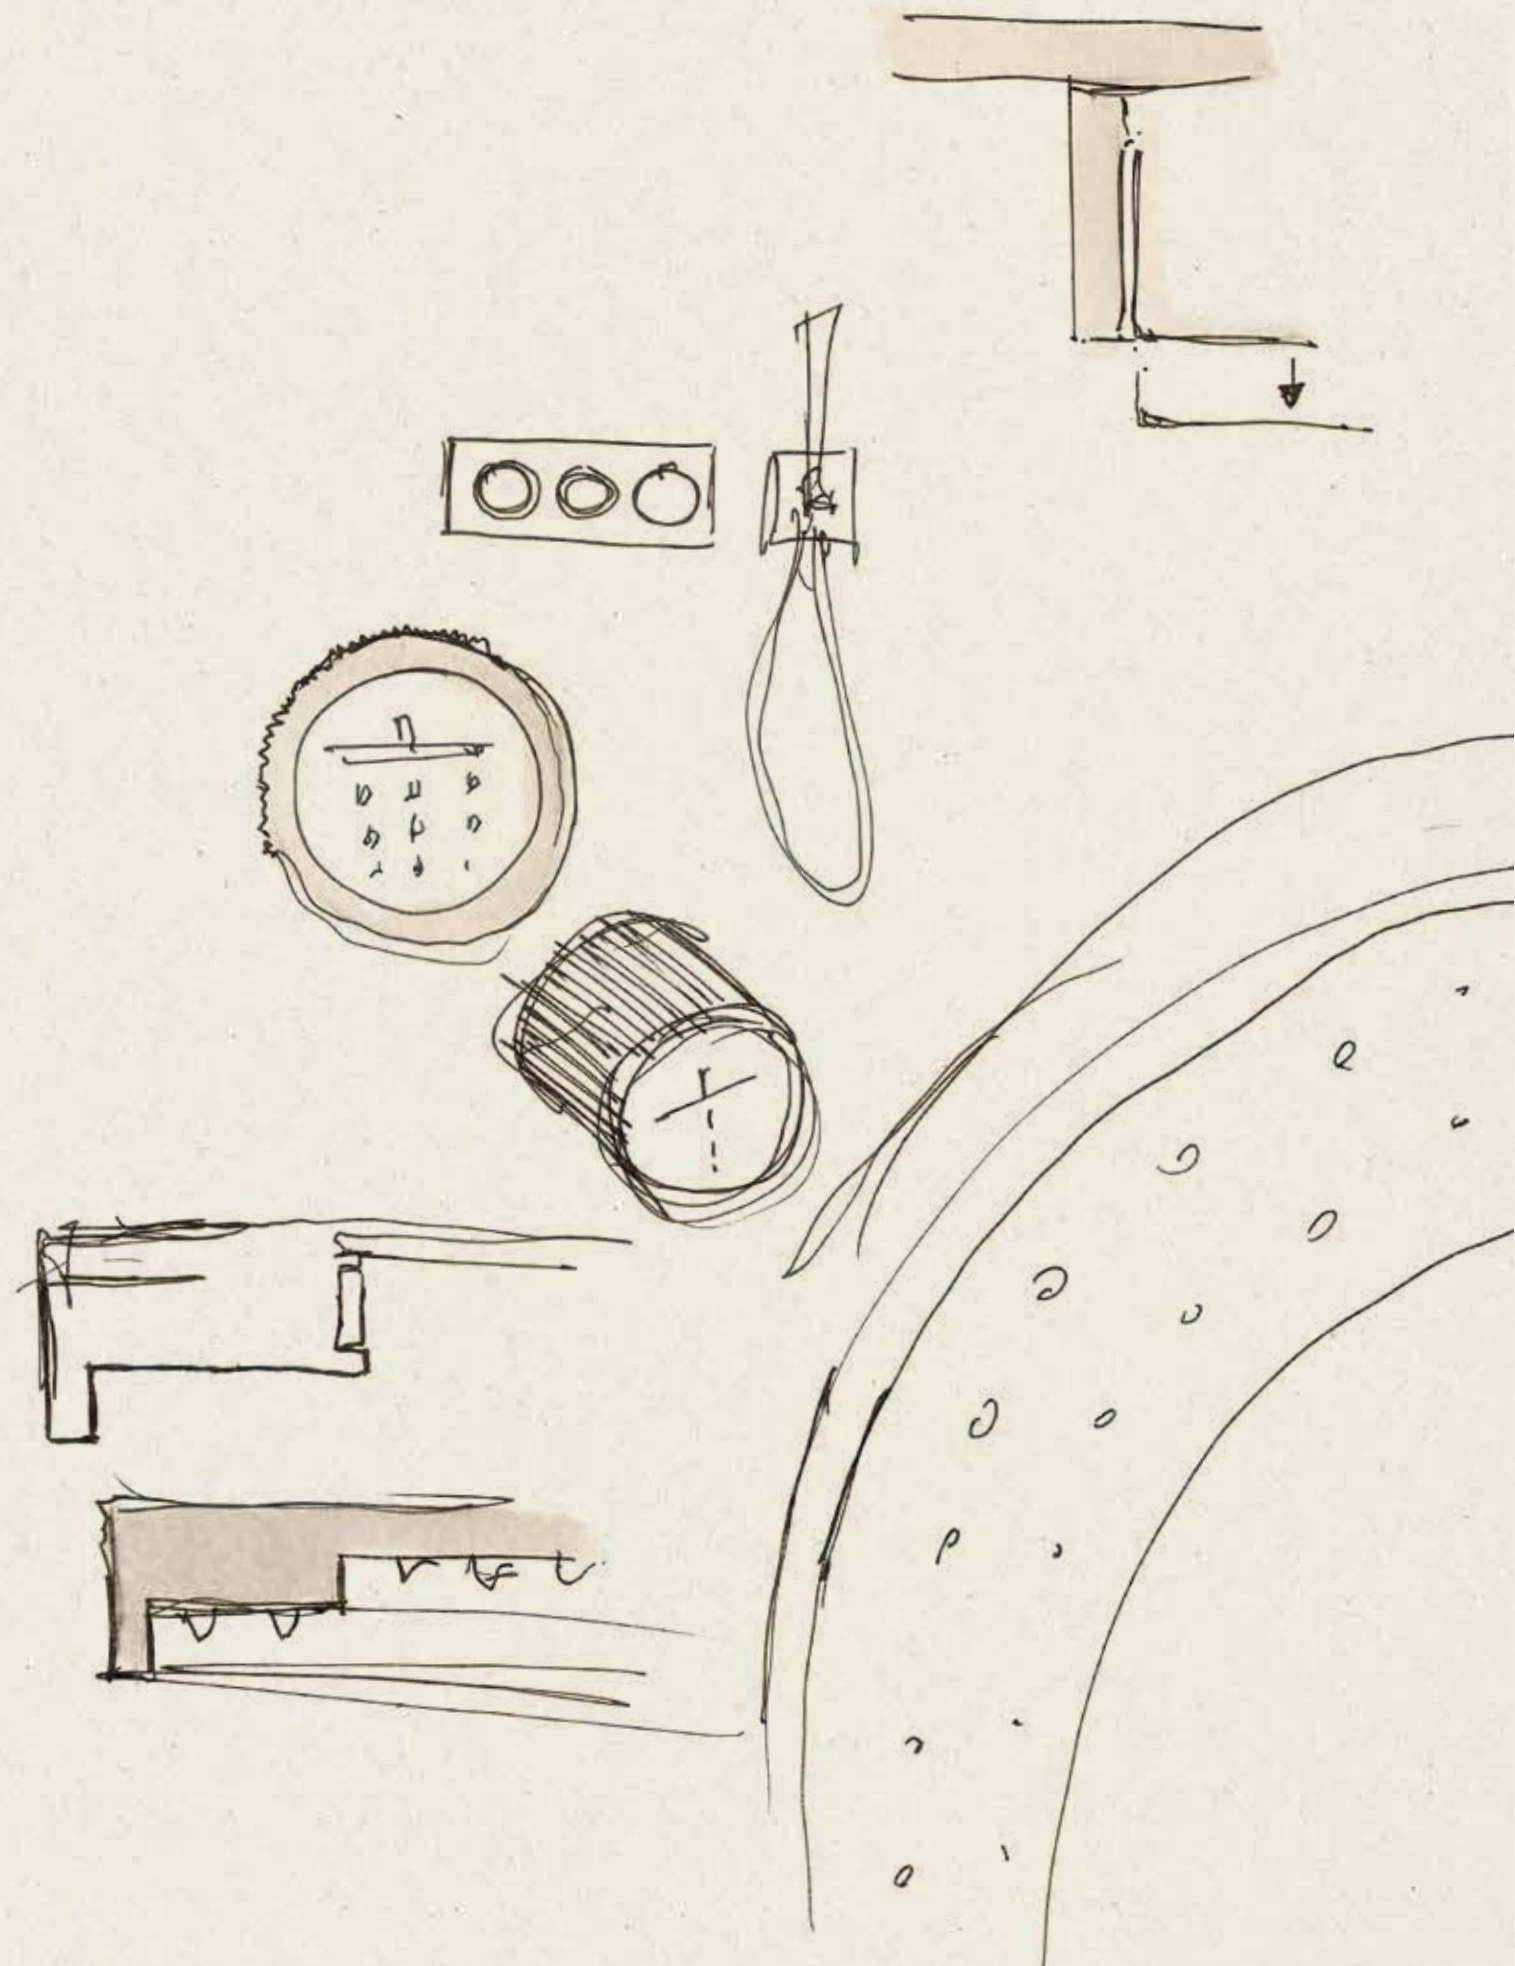

on or off by simply pressing and to adjust the desired flow of water by slightly turning. The circular design of the buttons, with their etched lines, not only enhances the aesthetics of the shower, but intuitively amplifies its function.

The refined simplicity and attention to all details are the essence of the design, which is achieved using innovative solutions and technical mastery.

*"I believe that the design for this shower collection literally represents the pursuit of what's essential, in the perfection of every detail combined with elegance and intuitive design, for an essential moment of well-being in our daily lives!"* B. Lejoly
