Elba

design : D. Rockwell

Stackable chair, chair with armrests and bar stool.
The Elba series also includes a lounge chair.

Structure: AISI 316 stainless steel, matt varnished in the colours in the collection or gloss varnished (reference colours: Mano Lucida wood sample collection); details and spacers in plastic materials.
Structural, load-bearing elements: Diade, available with white, grey, green or light blue background combined with Maris fabric.

Notes:
The Elba chair without armrests, the chair with armrests and the bar stool can be stacked up to four pieces.

The Diade elements are joined to the structure by means of stainless steel rivets finished to match the colour of the elements.

The elements composing the seat and the back of Elba are made of Diade, a patented thermo-formed plastic material, available with white, grey, green and light blue background coupled with Maris fabric. Maris designs Diade surfaces, generating an amazing textile appearance with unforeseeable mélange effects that are never the same. The colour irregularity, due to the structure of the Twiggy yarn used to produce the Maris fabric, is the featuring characteristic of this production process.

This product can be used also in interior environments.

We advise to use a Winter Set protection cover.
