Suspended bookshelf composed of four steel supports, to which wooden shelves can be fixed in the desired position.

Plate for the fixation to the ceiling: matt varnished steel complete with a covering panel in wood fiber finished Mano Lucida.
Side round supports: matt varnished steel in avorio or grafite colour.
Shelf: wood fiber finished Mano Lucida and complete of four stainless steel elements for the fixing to the structural supports.

Notes:
The steel plate for the fixation to the ceiling is supplied complete with a wood fiber panel finished Mano Lucida to be used to close and cover the plate.

The round steel side supports are offered by the linear meter.

The shelves can be positioned at the desired height thanks to the stainless steel elements to be fixed using the proper setscrews to the four side supports. Once the shelf is positioned, the four elements remain hidden in the wood thickness.

It is possible to create bookshelves with the desired number of shelves or with shelves in different colours.
